Projects

Fashion store

- End-to-End UX Design: Designed a high-fidelity fashion e-commerce prototype in Figma, featuring a seamless user flow from product discovery to a streamlined checkout process..
- Interactive Prototyping: Built dynamic interactions and micro-animations to simulate a real-world shopping experience, focusing on mobile responsiveness and accessibility.

Portfolio Using framer

- Designed and deployed a high-fidelity responsive portfolio featuring complex scroll-triggered animations and custom transitions using Framer's motion engine
- Optimized user experience by implementing a CMS-driven project gallery, resulting in a seamless browsing experience across desktop and mobile devices.
